Education

Bachelors of Computer Science: Software Engineering Stream 2013-Present
Carleton University, Ottawa, Ontario

- Currently in Second Year standing, 9.3/12 CGPA(B+)
- Expected graduation: April 2017 with honours

Availability

- Available part-time during the year, or full-time during the summer of 2014 starting May 1st.

Skills and Abilities/Experience and Accomplishments

Technical Skills

- Proficient in: Java, C, C++, Python, JavaScript, HTML, CSS, Ruby, and WordPress
- Experience in: Ruby on Rails, SQL, and PHP
- Engineered a Java GUI using the collections framework to sell out a concert stadium to ultimately increase ticket sales, and customer satisfaction
- Designed a virtual Snake game using the PyGame extension in Python with test-case development, and automated bots for finding errors or bugs within the collision detection
- Programmed in JavaScript/HTML to create a set of virtual 2d games allowing me to grasp web development architecture, readily available on my GitHub portfolio
- Created an encrypting program using the Linux environment and Virtual Box alongside C based programming to allow encrypting of sentences, and decrypting previously encrypted messages

Communication Skills

- Integrated user feedback surrounding IOS apps to enhance product quality, and ultimately resulting in an increased user base
- Designed Blackberry support modules with a team of co-op students which required communicating effectively within meetings, and effective verbal communication skills to meet work deadlines
- Practiced and strengthened verbal communication due to constant requirement of interacting with customers as a part time Mechanic, lead to increased vocabulary and easily being able to comfortably express myself in conversation, or writtenß

Leadership Skills

- Responsible for coordinating board meetings across multifunctional teams to increase product quality and work efficiency, ultimately leading to deadlines being met with ease
- Created Wizard in the Hat Mobile Studios with two other classmates which required three in-person meetings a week during which we hypothesized app ideas, created apps, and launched them

Work Experience

Junior Systems Administrator May 2014- August 2014

Department of National Defense/Government, Ottawa, ON

- Conducted query based analysis to coordinate schedules, and meetings alongside consulting with clients
- Lead the way to the creation of Blackberry support documentation which ultimately increased work efficiency
- First point of contact IT support which included creating tickets and getting computers or servers back online immediately once issues arise

Junior Auto-Mechanic

Feb 2010 - Dec 2013

Max Auto, Ottawa, ON

- First point of contact with customers, requiring strong verbal and written communication and effectively communicating issues to technicians
- Handled apprentice repairs including but not limited to oil changes, and brake light repairs

Applied Projects

Lead Designer, Wizard in the Hat Studios, Ottawa, ON

Sept 2014- Present

- Designed and implemented multiple projects using X-Code and C based programming when recreating apps including but not limited to: Flappy Bird, Space Shooter, and Candy Crush Saga
- Currently engineering and mastering a chatroom based application that will launch to the global market upon completion
- Organized and created cloud based hosting, group coding sessions within IOS development to increase company efficiency and product quality

Blogger/Programming Tutorials, www.shaiwanghazazani.com, Ottawa, ON

Feb 2013-Present

- Using repositories online utilized various concepts and created a personal blog/website as a place to re-teach concepts varying from programming techniques to personal posts
- Created a fun and effective environment to teach programming concepts

Extra-Curricular Activities

- Fitness/Sport enthusiast, active basketball player and intermediate power lifter
